---

THE SIXTEENTH ANNUAL REPORT  
OF  
THE COMMITTEE OF VISITORS  
OF THE  
LUNATIC ASYLUM, FOR THE CITY AND COUNTY OF  
BRISTOL.

---

Your Committee have pleasure in reporting that the state of the Asylum has been satisfactory.

The number of Patients in the Asylum at the date of the last Report was 122 Males and 147 Females, making a total of 269.

There are at the present time 136 Males and 166 Females, total 302.

The largest number resident at one time during the past year was 309.

The additions to the Asylum are progressing satisfactorily towards completion, and it is expected will be ready for occupation in the early part of the ensuing year.

Your Committee report that they have made an agreement with The Bristol Water-Works Company for supplying the Asylum with Water, both for domestic use and also in the event of fire, which, with the present resources, will be amply sufficient for the requirements of the establishment.

On the 3rd day of April last, the Hon. Greville Howard and James Wilkes, Esquire, two of the Commissioners in Lunacy, visited the Asylum, and again reported favourably. A copy of their Minute will accompany this report.

The Report of the Superintendent, which is annexed, will afford information as to the condition of the Asylum and its inmates.

The Establishment is in good order.

FREDERICK TERRELL,

CHAIRMAN.

Council House, Bristol,

29th December, 1876.

**R E P O R T**  
 OF THE  
**VISITING COMMISSIONERS IN LUNACY.**

---

BRISTOL ASYLUM,

April 3rd, 1876.

There are at present the same number of Patients as there were at the time of the last visit, on the 10th November, 1875, viz.: 277, of whom 122 are Men and 155 Women; of the latter sex, one is a private and five are out County Patients. The ordinary weekly rate is 12s., and for the out County Patients 14s., whilst the private patient pays 40 guineas a year.

There are 13 vacant beds in the male division; but the other is overcrowded, and in most of its Dormitories, the amount of cubical space proper for each Patient is not afforded.

The following have been the Admissions, Discharges, and Deaths since the last visit:—

		Males.	Females.	Total.
Admissions	...     ...	16	26	42
Discharges	...     ...	9	18	27
(Of whom recovered)	...     ...	7	16	23
Deaths	...     ...	8	7	15

No inquest has been held, nor has there been any fatal or serious accident to any patient.

Post Mortem examinations have been made in 11 instances.

The assigned causes of death do not require special remark. One death, however, resulted from erysipelas. Several Patients have been attacked by the same disease, and one of the women, whom we found in bed, as well as a Nurse, is at present suffering from it.

It seems to have been confined to the Female Wards, Nos. 15 and 16, and Mr. Thompson does not attribute it to any special cause.

The numbers last registered under medical treatment are 13 Men and 23 Women, and there were 3 Men and 6 Women to-day confined to their beds, none, however, suffering from any special disorder with the exception of the above-mentioned case of erysipelas, and the health of the patients is on the whole at present fairly good. We regret to state that the head Female Attendant, whose serious illness from Typhoid Fever was mentioned in the last Report, died shortly after. Since that time no fresh case has occurred.

The outbreaks of this disease which have taken place at particular seasons during the last three or four years, were, there was every reason to suppose, caused by the use of water from the two sources to which recourse was necessarily had when the other supplies failed in dry weather.

By an analysis of the Water Supply made in December last, it was shown that the water from these two sources was polluted and quite unfit for drinking purposes.

The Committee have now made an agreement with the Bristol Water-Works Company for a supply, but the works for obtaining it have not yet been commenced.

We cannot too strongly urge the necessity for there being no delay in this matter.

The length of piping to be laid down is four miles, and, as the ordinary supply now usually fails in June, unless this work is completed by that time resort will again have to be made to sources which have already proved fatal.

A further advantage will be gained by this arrangement with the Company, for when carried out, there will be sufficient pressure to throw water over any part of the building.

We have seen all the patients, and found one woman in seclusion, and another in a state of great excitement, in a room by herself, the door, however, not being locked. There is no record of mechanical restraint, and the patients who have been secluded are 3 Men and 8 Women, the former on 12 occasions, for a total of 131 hours, and the latter on 33, for 416 hours.

With the exception of 2 or 3 Women, all in both divisions were quiet. There seems to be an improvement in the state of their dress, but the men still change their linen only once a week, and Sunday suits are only given to those of them who work, and to a few others ; with an additional water supply, we hope the practice of bathing more than one patient in the same water will be entirely abandoned.

The Bedding is in very good order, and the rooms throughout were clean, well ventilated, and cheerful in aspect ; painting, papering, and decoration being well attended to.

There is a lack of Books and Newspapers, but we hear that a grant of £10 has been made to increase the stock.

About 60 of each sex attend the Sunday service in the Chapel, and yesterday 14 of the Men and 18 Women went to the Parish Church.

Sixty-eight of the men are employed, of whom 24 work on the Land, and 3 as Tailors, 2 as shoemakers, and 3 as Mat Makers.

Fourteen Women work in the Laundry, 2 in the kitchen, and 44 at needlework, and altogether 97 are employed in useful occupation of some kind.

There is a weekly entertainment, attended by from 50 to 60 of each sex. We are glad to find that the visits of friends are allowed on any day of the week.

Parties are taken out beyond the grounds once a week. About 50 Men and from 30 to 40 Women have this exercise. But it would be well if it could be given more frequently, at any rate in the case of the Women, and that they should be taken about the grounds as much as possible, since the airing courts they now have to use, owing to the building operations, are too small to afford them proper means of exercise.

Considerable confusion and inconvenience attend these works, which will give additional accommodation for 60 patients of each sex. The wing for males is much more advanced than that for females, and will shortly be roofed in. It is hoped that both wings will be finished in October. The provision of the necessary furniture will no doubt receive the early attention of the Visitors.

It is obvious that with the increased number of Patients, the present dining hall and chapel, as also the laundry and wash-house, and workshops, will be quite inadequate. We trust that the Visitors will take advantage of the present plant being on the premises, to build a detached Chapel, and so enlarge the Hall, and make the necessary additions to the Laundry and other buildings referred to. A considerable saving of expense would no doubt be thus effected and much disturbance avoided.

We have before alluded to the satisfactory state of the Wards, and we have much pleasure in reporting the improvements that are being made, and our opinion of the kindness with which the Patients appear to be treated.

GREVILLE HOWARD, } Commissioners  
JAMES WILKES, } in  
Lunacy.

SIXTEENTH ANNUAL REPORT  
OF  
THE MEDICAL SUPERINTENDENT.

1876.

*To the Committee of Visitors of the Bristol Lunatic Asylum.*  
January 1st, 1877.

GENTLEMEN,

I have the honour of submitting to you the Sixteenth Annual Report of the Medical Superintendent, which, together with the Statistical and Financial Tables annexed, will afford detailed information on all matters concerning the condition of the Asylum and its Inmates.

The Admissions, Re-admissions, Discharges, and Deaths are set forth in the following Table:—

	MALES.			FEMALES.		
	Private.	Pauper.	Total.	Private.	Pauper.	Total.
On the Books Dec. 31st, 1875. {	„	122	122	1	146	147
Admitted in 1876 ...	„	45	45	„	50	50
Re-admitted in 1876	„	5	5	„	9	9
Discharged :—						
„ Recovered	„	14	14	„	22	22
„ Relieved	„	1	1	„	1	1
„ Un-relieved	„	0	0	„	0	0
Removed .....	„	2	2	„	5	5
Died .....	„	19	19	„	12	12
Remaining Dec. 31st, 1876. {	„	136	136	1	165	166
Highest Numbers Resident {	„	139	139	1	169	170
Average Numbers Resident {	„	128	128	1	161	162

Comparison of  
Numbers.

On comparing the foregoing Table with the one contained in the Fifteenth Report, it will be seen that during the past year there has been an increase of 11 in the number admitted and re-admitted; of 8 in the number under treatment; of 16 in the highest number resident on any given day; of 8 in the average number resident; and of 33 in the number remaining in the Asylum at the end of the year.

The Admissions  
and Re-Ad-  
missions.

There has been a considerable increase in the number of patients admitted during the year, the number having reached the highest yet recorded, and exceeding the average numbers for the preceding 14 years—86·6—by 22·4. It is to be concluded, therefore, that some especial influence has caused this enormous increase. I remarked last year that there had been but a slight increase of admission of cases which had previously resided in one or other of the Workhouses of the contributing unions, eighteen such cases having been admitted. This year no less than 28 such cases have been admitted, and while the Asylum wards are being “crammed” with incurable cases, the Lunatic wards of the Workhouses are being slowly emptied. Though this result is that which was desired by Government and its advisers, when it was resolved to pay four shillings per head per week for all Pauper Lunatics confined in Asylums, it cannot but be deplored that an expensively constructed and managed Asylum such as this, which ought to be regarded as a hospital for the care and treatment of acute cases, is becoming every year more and more a retreat for the chronic and incurable cases, such as might be detained in the wards of any well-managed Workhouse. Three hopeless cases which had been for years in the Longwood House Private Asylum, were brought here on the breaking up of that establishment, and two other incurable cases were removed here from other institutions. On referring to table VII., it will be seen that 9 General Paralytics, 11 Epileptics, and 12 Patients suffering from other forms of chronic brain disorganisation were admitted. The proportion of

curable cases admitted, 42 altogether, viz.: 38.5 per cent., has never been so low since I was appointed to my office. Last year the proportion of such cases was 56 per cent. on the admissions. Two women were admitted in a pregnant state.

Fourteen Men and 22 Women were deemed recovered on <sup>The Discharges.</sup> being discharged; 2 Men and 5 Women were removed to other Asylums and were in some degree "relieved" as to the urgency of their symptoms; 1 Man and 1 Woman escaped, making a total of 17 Men and 28 Women who were discharged from the Asylum. At the date of this report, 1 Man is absent from the Asylum whose name is still on the books, he having escaped on the 21st of December. The circumstances connected with the escapes were duly reported to you at the time of their occurrence, and I need not repeat them. The Man's escape was due to an act of folly and negligence committed by the attendant in charge of him; but the case of the Woman was of entirely a different nature. There is no doubt that her husband, who in the first instance, was most anxious to have her placed under the care she much needed, secreted her, threw those in search of her off her track, and on at least one occasion spent some considerable time in her company during the interval in which re-capture is allowed by the statute. I regret, as I am sure you do, that there is no law by which such offenders as he can be punished. Both Patients were deemed relieved when their names were erased from the Asylum books. The proportion of recoveries on the admissions was 33 per cent.

Nineteen Males and 12 Females died—total 31—during the year. Calculated on the average number resident, it will be found to be lower than for several years past, but it is still high as compared with the average death rate in all the English County and Borough Asylums. This, no doubt, is due to the large proportion of cases received who are suffering from some of the many forms of organic brain disease. The death rate was, then, 10.6 per cent. on the average number resident, and 8.2 per cent. on the

entire number under treatment. The average age at death was 48 years. The causes of death were as follows:—Disorganisation of the Brain, 9; Epilepsy, 5; General Paralysis of the Insane, 5; Pulmonary Consumption, 2; Pneumonia, 1; Heart Disease, 1; Cirrhosis of the Liver, 1; Strumous Peritonitis, 1; Bright's Disease, 1; Exhaustion after Mania, 1; Exhaustion after Carbuncle, 1; Senile Decay, 1; and Suicide by hanging, 1.

**Inquests.**

Two inquests have been held during the year. The first inquest was held upon a woman who, the morning after admission, hanged herself to the shutter-bar of the room in which she had spent the night. The bar had been insecurely fastened through the negligence of a nurse, and but for such act of neglect the deplorable event could not have happened. It is the first suicide which has occurred in this Asylum ; and, as was pointed out to the Coroner and Jury, the unfortunate woman was the last of a list of 499 Patients who, previous to admission, had attempted their life.

The second inquest was with reference to the death of an Epileptic Youth who was found dead by the night Attendant shortly after he had been seen alive. He was lying in such a position as to exclude the possibility of suffocation by the burying of his face in his bed or pillow. The verdict of having “Died in an Epileptic Fit” was returned. The Jury thought an inquest in this case unnecessary, but it was pointed out to them by the coroner that it was best, in any case of sudden and unexpected death in an Asylum, to have a full inquiry before a properly constituted Court for the satisfaction of the public, the friends of the deceased, and the Asylum Officials.

**Birth.**

One of the Patients referred to under the head of admissions was delivered of a still-born female child on December 13th, and is going on favourably.

**Accidents.**

Two Accidents, of some severity, but not of much danger to life, occurred. An old Woman, of irascible temperament,

threw down with considerable violence an idiot girl (M.R.), and in so doing caused in the latter fracture of the anatomical neck of the right humerus.

A Man (R.J., better known as "Shilo") while carrying a tray-full of bread, fell helplessly, and sustained a compound comminuted fracture of the right tibia and fibula. He is still in bed, two months after the accident, but the injury is gradually being repaired.

I referred in my Fifteenth Report to this Woman, who The last of the case of E. W. during the year had swallowed a mass of iron consisting of 13 shutter-screws, and weighing  $24\frac{1}{2}$  oz., of which at the date of that Report she had parted with 5 of the screws. The remainder were got rid of by the 4th of February in the year just closed, and a month afterwards she was transferred to the Asylum of her own county.

In the months of January, March, April, and May several The General Health. of the Patients, and one Attendant, suffered from erysipelas, the attacks varying in severity, and in two or three instances the disease formed a secondary cause of death. I failed to connect the disease with any known cause, and the cases (14 in all) were distributed all over the Asylum, but unevenly so. The wards known as Nos. 15 and 16, in the Women's division, suffered most severely, both in numbers attacked and gravity of symptoms. No case of Typhoid Fever has occurred since the death of the female head Attendant in November, 1875. This may be due to the fact that no water has been pumped from the "Grove" well since the month preceding that event.

I think a review of the several attacks of Typhoid Fever The several Epidemics of Typhoid Fever. which have occurred since its first introduction may be of the highest possible etiological interest, and so I venture to place on record the following facts:—

The disease first appeared in the person of H. L., on the 27th of September, 1873, and the remarkable coincidence of its occurrence, shortly after there being such a case at the house of the milk contractor, has been referred to by the Commissioners in Lunacy and myself on more than one occasion. But in that year, I regret to say, that no record was kept of the sources from whence we derived water, but it is more than probable that the well in the Grove was the source at that time. In that year, then, there were five cases of fever from the date I have named to the 8th of November.

In the year 1874 we have better data. The Grove water was used from March 23rd to March 30th. Two cases of fever were recognised on the 28th of April. Water was had from the same source almost continuously from May 28th to September 7th. From the 9th of July to the 13th of October fifteen cases were recognised.

In the first half-year of 1875, the Engineer's dates are not clearly stated, but it appears that previously to July 15th, the Grove water had been used for 42 days, the pumping being almost continuous for four weeks before that date. The same source was resorted to, with short intermissions, from August 27th to October 21st. In the month of July four cases, and in October two cases, were first recognised.

The present  
Water Supply.

During the present year we have not resorted to the Grove for water, and during the long drought we were reduced to what was barely enough for cooking and ordinary washing purposes. But for the providential presence of a large bulk of water, which had been left in a quarry belonging to Mr. Thomas Hutton, and which was easily connected with that of Mr. Nicholas, we must have gone to the Grove for water. This avoidance of the impure source was not carried out without considerable expense, as will appear in the accounts; but to avoid so certain a risk as the introduction into the Asylum of water which is conclusively proved to be so dangerous, was of more consequence to us than any question of expense.

The system of pipes to connect the Asylum with the Durd- <sup>The prospects of</sup> ham Down reservoir of the Bristol Water Works Company is now nearly completed, and the Company's Engineer is hopeful that he may be able to charge the main early in the present month. Nothing can then limit the supply to us of a water which is said to be suitable for all purposes. The Company's pressure will give us a considerable "head" of water to be used in the case of a fire, there being sixteen hydrants inside and outside the Asylum. The tanks in the towers will be filled from the main, and from these the Asylum will be supplied with water through the hitherto existing pipes and cocks. I would recommend, however, that the present engine and pumps be allowed to remain as they are, so that if the Company's supply should fail temporarily or permanently, a means would exist of supply for some period.

The hope expressed in the last Report as to the occupancy <sup>The New Build</sup> <sub>ings.</sub> of the new buildings has not been fulfilled. This is due to a variety of circumstances over which you have little or no control. The new wing for Men is now all but finished, and will surely be ready for occupation by May next. The completion of the Women's wing will, I have no doubt, speedily follow on that event.

The only change which has occurred in the staff has been <sup>Staff of Officers.</sup> consequent on the resignation of Mr. F. A. King, and the appointment in his place of a new Clerk and Steward. By raising the salary you had a large number of eligible candidates, and amongst them was Mr. John Thompson, who had undergone a severe training at the Worcester County Asylum. Mr. Thompson was elected, and my experience of him assures me that he well merited the very high opinion which had been formed of him at Worcester. Miss Webb entered upon her duties on the 1st of January, and has proved herself to be a diligent, painstaking, and trustworthy Head Attendant.

The Attendants  
and Servants.

Two men and one woman were summarily dismissed for breaches of the rules; but on the whole the conduct of the Attendants and Servants has been satisfactory. With pleasure I report that one of the Attendants, Miss Sarah Hill, was appointed Head-Attendant at the Northamptonshire Asylum. Higher wages, elsewhere, have tempted some of our staff to leave us, but a large proportion of those remaining are enjoying the advanced pay which length of service entitles them to receive, and another year's experience convinces me that the augmenting scale of wages, adopted last year, is conducive to much comfort in the management of the Asylum, and more particularly to the confidence of the Patients.

In conclusion, I tender to you, Gentlemen, my sincere thanks for your kindness and trust, and I remain

Your obedient servant,

GEORGE THOMPSON, L.R.C.P., London,

Medical Superintendent.

---

# CHAPLAIN'S REPORT.

---

STAPLETON ASYLUM,

*23rd December, 1876.*

GENTLEMEN,

I have again to present to you my Annual Report. As in past times, the usual Services have been held, and the usual Sermons preached, both upon Sundays and week days. The Holy Communion has been administered four times in the Chapel, and, with the sanction of the Medical Authorities, it has also been given in the Wards occasionally to those Patients who desired it. I am happy to say that my ministrations and visits seem to be appreciated; the Sermon is often the subject of conversation, and many have told me "they have felt greatly comforted." It is true these feelings of comfort may speedily pass away, but in a monotonous existence they have still their value, and are, at all events, a passing bloom in the desert. I am often obliged to be the listener to every temporal as well as spiritual grief, and it is sometimes amusing to hear that the Chaplain is armed with all power and authority, and it is with difficulty I can make it understood that outside of my own department I am really almost as powerless as themselves.

The cases of religious insanity are still to me the saddest. There is in some instances a lethargy which beats back every word of comfort, and in others a fiery excitement which cannot hear; all that can be done (I am speaking of myself) is to watch the returning bodily health, and supplement other efforts with cheering words and passages which abound with God's love.

I have to thank you, Gentlemen, in the first place, for your recent gift of Books, which has been gladly received and warmly welcomed here; and in the next place, for the continued confidence you have reposed in me.

I am, Gentlemen,

Your obedient Servant.

J. BURCHELL SPRING, CHAPLAIN,
